

**XII INTERNATIONAL CONFERENCE ON KMC WORKSHOP
14 – 17 November
BOGOTA, COLOMBIA/ 2018**

XII INTERNATIONAL WORKSHOP ON KMC /INK 2018

Diffusion of Kangaroo Mother Care at a country scale

14 of November 2018

TIME	ACTIVITY	COMMENTS
7:30-8:30	Registration	Installation of posters (workshop Topics) and commercial stands (Lycra bands and non-disposable diapers: the kangaroo diaper)
Inauguration The challenge: KMC dissemination at a country scale		
8:30-9:30	Introduction of participants, Presentation of the working groups and the goals of each working group. Distribution of participants in the different groups	PUF (Rector) UNICEF Health Ministry OPS Nathalie Charpak, Juan Gabriel Ruiz,
	Presentation of the academic and social program	
9:00-9:30	Brief summary of the Trieste workshop and presentation of the article published in the BMC	Adriano Cattaneo, Anne Marie Berg
Coffee 9:30-10:00		
Working in 7 groups 10:00-17:00 Lunch break 12:30 to 13:30 Coffee break 15:30 to 15:45		
	Participants	

TIME	ACTIVITY	COMMENTS
Group 1	Moderators: T Guenther* Nathalie Charpak Ministry of Health Ornella Lincetto	<p>Selection of a minimum set of indicators to assess dissemination at country level</p> <p>1) Indicators of the target population: Live births, number and proportion of preterm births, number and proportion of LBW infants. Perinatal mortality, early neonatal mortality (7 days), neonatal mortality (28 days), stratification according to gestational age and/or birth weight. 2) Indicators of the target health care facilities: Number and distribution of level I, level II and Level III maternity/neonatal health care facilities. Number of obstetricians, pediatricians, neonatologists. Number of neonatal care beds/incubators in basic, intermediate and intensive neonatal care. Milk banks? Other? 3) Indicators of utilization of health care facilities: Proportion of deliveries in health care facilities, proportion of preterm or LBW deliveries in health care facilities, proportion of high risk home/community deliveries, proportion of referrals of high risk newborns to neonatal care units/facilities. Indicators of overcrowding? 4) Coverage of hospital-based KMC: proportion of health care facilities with a nominal hospital-based KMC. Proportion of preterm and/or LBW infants delivered in facilities with a nominal hospital-based KMC program. 5) Indicators of KMC uptake 6) Indicators of Quality of KMC programs 7) potential sources of information 8) Denominators to be employed for constructing indicators. 9) Reduction to brainstormed indicators to a minimum set.</p>
Group 2	Moderators: Sarah Moxon Karlee Silver Fundacion Exito Ministry of Health Goldy Mazias	<p>Integrating KMC in the working objectives of non-governmental organizations (NGOs) Development partners (WHO, UNICEF, USAID) and institutions private and public</p> <p>How could the definition of KMC and the inclusion criteria for the KMC program be standardized? How to avoid “simplification” and “trivialization” of KMC? What are the best strategies to support the first implementation of a KMC program and to promote sustainability? How does one build a set of KMC manuals that are easy to access and download?</p>
Group 3	Moderators: Adriana Montealegre	<p>Implementation of KMC in all hospitals in a country.</p> <p>What are the best strategies for implementing KMC</p>

TIME	ACTIVITY	COMMENTS
	Deepa Banker Ministry of Health	across a country? (What are the basic hospital needs/requirements for KMC implementation?) Should levels/steps of KMC implementation be devised to facilitate hospital level-specific adoption of KMC? How to involve the community in a hospital based-KMC implementation?)
Group 4	Moderators: Natalia Godoy Mantoa Mokhachane Ministry of Health	KMC transport What is the most common mode of neonatal transport used in the country? What are the challenges to neonatal transport in the country? How can KMC transport be integrated into the system, as the best choice? What are the best strategies to inform and convince all primary health centers and first level hospitals on the safety and superiority of KMC for transportation once the baby is born? Do you have isolated areas? Did you try KMC as a mean for transportation? How to train primary health care centers and first level hospitals in KMC for transportation? Requirements? Is there any KMC training given to the paramedics who transport neonates?
Group 5	Moderators: Jose Maria Solano Anne Marie Bergh Javier Diaz/Ministry of Health	Getting health ministries and academic/ professional associations on board How many professional associations are/may be involved in national KMC implementation? What other government agencies need to be engaged in order for KMC to be implemented as a national program? Is there a role for academic institutions in KMC implementation? If so, which ones should be involved? What are the best strategies and needs to convince health ministries and professional associations to adopt KMC as a routine care for premature and LBW infant?
Group 6	Moderators: Socorro De Leon-Mendoza Ministry of Health Juan Gabriel Ruiz	Establishing a system of KMC follow-up to assure safety and document benefits Is there a national system of high-risk follow-up recommended by the health ministry and concerned professional organizations?

TIME	ACTIVITY	COMMENTS
		<p>What is the degree of compliance with these recommendations?</p> <p>Is there a national system for “tracking” KMC discharges and follow-up?</p> <p>What are the minimum requirements for this system to be adopted at country scale?</p> <p>What strategies may be employed for monitoring compliance to ambulatory KMC, at hospital and patient level?</p> <p>Is there a role for community-based high-risk follow-up care of KMC discharges?</p> <p>What would be the risks and benefits for community-based ambulatory KMC?</p>
Group 7	Moderators: Susan Ludington Ana Maria Bertolotto Ministry of Health	KMC for term infants: state of art 2018 (including essential newborn care initiative)
17:00-18:00	Viewing posters	

15 of November 2018

TIME	ACTIVITY
7:00-11:00	Visit of KMC programs in Bogota: 6 buses, 20 people each. Inscription will be necessary.
11:00 -13:00	Working groups in individual rooms, conclusion and final proposal of the group
13:00 a 14:00	Lunch
14:00-17:00	Presentation of each of the 7 reports and discussion
17:00-18:00	Choice of the 3 best posters on KMC implementation and dissemination at country level for oral presentation during the congress
19:00	Dinner
